MARTON TECHNOLOGIES

CORPORATE OVERVIEW

CURRENT & PAST PERFORMANCE

Defense Health Agency	Medical and public health emergency preparedness and response planning services and web-based decision support tool development.
Federal Aviation Administration (FAA)	Comprehensive occupational health and safety services to include policy development, and National Environmental Policy Act (NEPA) audit and evaluation services.
Naval Facilities Engineering Command	Laboratory analysis, environmental sampling and permit compliance for eight U.S. Navy bases located in the Mid-Atlantic Region.
Thermo Fisher Scientific	Instructor and Training Support Services, Course Curriculum Development and Mobile Training Teams.
Transportation Security Administration (TSA)	Occupational Safety and Health and Environmental (ESOH) Services.
U.S. Air Force	Help desk and distance learning support. Also provided server deployments and maintenance, network architecture and support, and PC deployments and support.
U.S. Army	Installation Logistics Readiness Center (LRC) maintenance, supply and transportation support.
U.S. Army	Installation environmental compliance and Army training help desk support.
U.S. Army Combined Arms Support Command (CASCOM)	Full spectrum capabilities development, JCIDS documentation, and integration including Operational Architecture (OA) and System Architecture (SA). Tasks are performed for Sustainment Information Systems (SIS), Enterprise Resource Program (ERP) solutions and Mission Command Systems (MCS) automated systems as well as other evolving/emerging technologies or initiatives. On a separate contract, we provide quality assurance (QA) services including curriculum audit, inspection and validation of Army National Guard and Reserve service school curriculum IAW TRADOC standards.
U.S. Army Sustainment Center of Excellence (SCOE)	Curriculum development and instructor training and training support services such as administrative and operations support for logistics, transportation, and other sustainment functions. We provide classroom, performance-oriented, simulation and simulator-based training, and field training exercise (FTX) support.
U.S. Department of State (DOS)	Comprehensive environmental, safety, and occupational health (ESOH) services.
U.S. Marine Corps	Under a subcontract, we plan, prepare, and execute computer-aided combat simulations for joint and allied/foreign partners at multiple locations.
U.S. Navy	Custom web application development, maintenance, and support. Provided equipment training, course development, and equipment maintenance.
U.S. Navy Bureau of Medicine and Surgery	Capabilities-based Assessments
U.S. Northern Command (NORTHCOM)	Advisory and Assistance Services (A&AS) for force health protection, capability development, and emergency preparedness.

ABOUT MARTON TECHNOLOGIES

At Marton Technologies, our commitment to building innovative solutions for our customers has allowed us to thrive as a leading provider of technology, scientific and professional services. Founded in 2005 with a philosophy centered on earning and maintaining the trust of our clients through honor, integrity, and quality, Marton is a seasoned prime contractor ranging in scope from single award projects to multi-award ID/IQ task order based contracts.

Our veteran leadership has the experience to gain an intimate understanding of our customers' businesses, and work alongside them to achieve and exceed their objectives. Marton has spent over 12 years forming quality partnerships and building strong relationships with our customers. These efforts have allowed us to consistently earn repeat business and achieve excellent CPARS ratings. Additionally, Marton's performance and success are evidenced by its award of the 2015 Virginia Chamber of Commerce "Fantastic 50" Award and the 2017 Hampton Roads, Virginia "Roaring 20" Award.

Marton has developed invaluable relationships with agencies like the Department of Defense (DoD), NORAD/NORTHCOM and the Department of State (DOS) while operating domestically and abroad in joint efforts throughout the years, continuing our proven track record of supporting critical missions throughout the nation.

COMMITTED TO HIRING VETERANS

Marton believes in our military veterans. By incorporating their strengths and values into our workforce, we are able to participate in our veteran's post-service success while adding value to our organization. The U.S. military strives for excellence, and we at Marton have the same expectations. We take pride in helping our veterans continue to have a positive impact throughout the world.

BUILDING A NETWORK OF SUCCESS

At Marton, a partnership means combining our strengths in an effort to increase impact, capability and innovation. We focus our partnering efforts on identifying those organizations that possess the strong ethical characteristics and comparable business acumen that we lead with at every step. Adhering to those values while providing services and developing relationships with our customers has led to continued success for our organization as well as our partners.

OUR SERVICES

Logistics

We provide complete logistics mission support spanning areas from logistics military occupational specialties (MOS) training to providing direct services under the three logistics functional areas of maintenance, supply and transportation. Our team has an acute understanding of Integrated Logistics Support (ILS) through development of comprehensive and executable logistics support plans. Marton is a BOA holder under the Enhanced Army Global Logistics Enterprise (EAGLE) Basic Ordering Agreement (BOA). The EAGLE program consolidated installation logistics functions in the United States and overseas under one Prime contractor at each location.

Force Development

Our organization is a proven supplier of the full range of force development services. We have supported Army and Navy force development and modernization efforts as well as the Air Force, Geographic Combatant Commands and the Joint Staff. We offer exceptional value by providing researchers, analysts, and developers who have formal academic training and education, subject matter expertise, and operational experience coupled with verifiable, repeatable processes at an affordable price. Our full spectrum of services range from initial capability gap identification through employment and sustainment planning.

Training & Support

We provide instructor training support services for various organizations, including federal agencies, private corporations, state and local organizations and the Department of Defense. As renowned subject matter experts (SMEs) in various industries, Marton has developed technical U.S. Navy training courses, National Guard Bureau (NGB) courses and program of instruction (POI) for the U.S. Army. Our organization provides customized training solutions for any level of employee, as well as continuing education and certification preparation for professionals in those industries.

Emerging technologies are rapidly presenting opportunities for the advancement of traditional training environments. Our organization is on the bleeding edge of integrating Virtual Reality (VR), Augmented Reality (AR) and Wearable technology with existing training exercises to create fully immersive and interactive training environments for a wide range of military applications. AR and VR have potential applications beyond training, and Marton is working with industry leaders and innovative companies to create cost savings opportunities, efficiency, compliance, and process improvements for our customers.

Environmental, Safety, & Occupational Health

Navigating through the complex regulatory landscape can be daunting. Marton is focused on protecting employee health & safety and company resources by achieving and maintaining regulatory compliance. Marton is positioned to develop and implement cost effective, practical solutions for environmental, safety and occupational health issues. Our staff has extensive military, federal service, and general industry experience, and are able to assist you with any Occupational Safety and Health (OSH) or Industrial hygiene (IH) needs.

Information Technology & Cyber Security

Our organization understands the importance and impact of secure end-to-end IT solutions. We provide full spectrum IT services for government and commercial customers including cyber security and threat management. Given the unpredictable nature of the industry, our experts develop, implement, maintain, and provide support for custom applications built to exceed the rapidly changing requirements of any mission while ensuring that our clients maintain a strategic advantage.

Staff & Administrative Support

Marton is a strategic supplier of personnel and workforce solutions. We employ flexible policies enabling us to respond rapidly to highly variable requirements. Our experienced recruiters utilize their expertise to ensure quality while meeting demands quickly. Our organization provides personnel experienced in administrative, staff operations, and logistics resources support for entry-level through executive-level personnel. Additionally, administrative personnel execute Electronic Military Personnel Operations (eMILPO) functions daily, including processing personnel record briefs, skill reclassifications, suspension of personnel favorable actions, legal actions, and Records of Emergency Data. Administrative personnel also process awards, promotions and performance evaluations, including associated orders.
